C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

Headquartered in Singapore, Musim Mas Group is a fully integrated palm oil corporation that delivers the highest quality and innovative palm oil products and derivatives used across multiple industries worldwide.

As one of the most prominent players in the palm oil industry, we aspire to be a responsible leader in the evolution of the industry, driving a new era of sustainability with innovation across the globe. To that aim, our dedicated, global team of professionals across the entire palm oil supply chain work closely with local and international stakeholders, ensuring that our products are economically viable, socially responsible, and environmentally appropriate.

Since 1972, Musim Mas has established deep and long-standing relationships with our customers and stakeholders worldwide. Our multi-cultural and multi-disciplinary workforce, located in 13 countries, brings innovation to meet the growing needs of our customers.

We are proud to be the preferred supply chain partner for palm oil and its derivatives. From our plantations, mills, refineries, kernel crushing plants, oleochemicals, and specialty fats plants, we manufacture palm oil and value-added derivatives before exporting these to customers via our extensive fleet of tankers and barges. Today, Musim Mas is Indonesia’s largest palm oil exporter to customers located all around the world.

The steady growth of Musim Mas is underpinned by the quality of our management and supported by professionals dedicated to the highest standards of quality, safety, and efficiency. Our global marketing activities are undertaken by Inter-Continental Oils and Fats (ICOF), a member of Musim Mas Group.

Despite these achievements our business continues to face new challenges. As we have progressed, so have expectations from stakeholders for a responsible supply base. To achieve this, environmental stewardship has been a core pillar of our sustainability measures. Musim Mas strives to minimise and mitigate adverse impacts on the environment, by regularly assessing the impact of our operations through tools or exercises such as RSPO PalmGHG and CDP. We initiated our first Life Cycle Assessment (LCA) in 2019, to evaluate the impact of our operations on the environment, as well as develop holistic mitigation plans to minimize those impacts.

Musim Mas takes the impact of climate change seriously and is strongly committed to minimising GHG emissions within our operations. Our sustainability teams, senior management and the Board, are involved in decision-making pertaining to our climate-related risks and opportunities to ensure emission reductions are adequately managed throughout our operations.

C0.2

(C0.2) State the start and end date of the year for which you are reporting data.

<table>
<thead>
<tr>
<th>Reporting year</th>
<th>Start date</th>

<td>&lt;Not Applicable&gt;</td>
<td>More frequently than quarterly</td>
</tr>
</tbody>
</table>

C1.2a

(C1.2a) Describe where in the organizational structure this/these position(s) or committee(s) lie, what their associated responsibilities are, and how climate-related issues are monitored (do not include the names of individuals).

i.) Where in the organizational structure the committee lies

It is a combination of management level from various departments within Musim Mas such as Sustainability department, Strategy and Planning department, Estate department, Processing department, Corporate General Affair Department, Corporate Communication Department, Production Planning and Inventory Control Department, Corporate Safety Health Environment and Quality - Development and Implementation Department, Sustainable Supply Chain Department. The committee frequently report to the President Director regarding sustainability, climate and GHG emission reduction issues.

ii.) A rationale of why responsibilities for climate-related issues have been assigned to this committee

Musim Mas has adopted several sustainability certification and verification schemes, such as Roundtable Sustainable Palm Oil (RSPO), International Sustainability & Carbon Certification (ISCC), Palm Oil Innovation Group (POIG), Indonesian Sustainable Palm Oil (ISPO), Italian National Sustainability Certification System (TSNCS / INS) and etcetera. All those schemes focus on the climate-related issues and sustainable practice. The Sustainability committee is a combination of various departments along the supply chain who are responsible to monitor the development regarding sustainability and climate issues, assess any risks and opportunities and implement and manage sustainability and climate programs as well as maintain conformity with all the certification and verification schemes as well as our Sustainability Policy at all stages of the supply chain.

C1.3

(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?

<table>
<thead>
<tr>

<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td></td>
</tr>
</tbody>
</table>

C1.3a

(C1.3a) Provide further details on the incentives provided for the management of climate-related issues (do not include the names of individuals).

<table>
<thead>
<tr>
<th>Entitled to incentive</th>
<th>Type of incentive</th>
<th>Activity incentivized</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>All employees</td>
<td>Monetary reward</td>
<td>Emissions reduction project</td>
<td>In current business environment, proper climate change management is integral to the performance of the company. Musim Mas aware that the vision and mission on Sustainability must be shared and conveyed to all level of staffs so all staffs can share the same goals with the company and take part on the realization process. Monetary incentives are awarded based on performance. In addition, Musim Mas encourages staffs to come up with an improvement idea and submit a project to reduce emissions for daily operation to be reviewed and considered by the management level. Management level will deliberate with board level on the idea and project submitted by the staff. In return, the staff will be rewarded monetarily (cash, holiday trip, electronics).</td>
</tr>
<tr>
<td>Other, please specify (Raw Material Suppliers)</td>
<td>Monetary reward</td>
<td>Environmental criteria included in purchases</td>
<td>In current business environment, proper climate change management is integral to the performance of the company. Musim Mas aware that the vision and mission on Sustainability must be shared and conveyed to all stakeholders including our raw material suppliers i.e. smallholders or small farmers supplying raw material for our production. We encourage and engage small farmers, educating them on Sustainable Practices in order to reduce the risk of climate change. We help and facilitate our scheme smallholders to obtain Sustainability Certification and Verification and is thus directly linked to their earning. For example : a sustainability certified raw material would have better price in the market nowadays, rather than those raw material without sustainability certificate. When the farmers receive more earnings they have more access to better education for their children, better access to health</td>
</tr>
<tr>
<td>All employees</td>
<td>Monetary reward</td>
<td>Company performance against a climate-related sustainability index</td>
<td>In current business environment, proper climate change management is integral to the performance of the company and is thus indirectly linked to the size of the annual bonus that is distributed to the employees. For example, NDPE market is emerging these days and many customers are operating in such market demanding producers to follow standards of Sustainability. There is an increasing demand for the suppliers that are comply with NDPE policy, which enable the production of sustainable and low emission products, which generate more revenue for the company, which indirectly has positive impact on employees' income.</td>
</tr>
</tbody>
</table>

C2. Risks and opportunities

C2.1
(C2.1) Does your organization have a process for identifying, assessing, and responding to climate-related risks and opportunities? Yes

C2.1a

(C2.1a) How does your organization define short-, medium- and long-term time horizons?

<td>Long-term</td>
<td>10</td>
<td>20</td>
<td></td>
</tr>
</tbody>
</table>

C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

Musim Mas defines substantive financial impact as:

- Any impact which could potentially inflict financial loss around 10 percent or higher of current EBITDA estimates.
- Any climatic event that will drastically affect the yield and productivity of oil palm crop as well as palm oil supply.
- Any drastic drop in supply (of raw materials) of 20 percent or more, which affect our production cost as well as production volume.

C2.2
(C2.2) Describe your process(es) for identifying, assessing and responding to climate-related risks and opportunities.

<table>
<thead>
<tr>
<th>Value chain stage(s) covered</th>
<th>Risk management process</th>
<th>Frequency of assessment</th>

(C2.2a) Which risk types are considered in your organization’s climate-related risk assessments?

<table>
<thead>
<tr>
<th>Risk Types</th>
<th>Relevance</th>
<th>Inclusion</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current regulation</td>
<td>Relevant, always included</td>
<td>We and all our suppliers must comply with applicable national and/or local laws and regulations especially those related but not limited to labour, health and safety, natural environment and local communities. Regulation is relevant for us and will always included and considered for climate-related risk assessments. E.g.: Peraturan Menteri Pertanian Republik Indonesia Nomor 11/Permentan/OT.140/3/2015 is relevant for us and is included and considered for climate-related risk assessments.</td>
<td></td>
</tr>
<tr>
<td>Emerging regulation</td>
<td>Relevant, always included</td>
<td>There are risks in changes in regulation which we constantly monitor and considere in the risk assessment. E.g: The emerging ISCC regulation that adopts EU RED II might forced us to further reduce our GHG emission.</td>
<td></td>
</tr>
<tr>
<td>Technology</td>
<td>Relevant, always included</td>
<td>There are risks in the relatively new technology which we have implemented to tackle climate change may fail (for example: methane capture technology). This risk is always included in our risk assessment.</td>
<td></td>
</tr>
<tr>
<td>Legal</td>
<td>Relevant, always included</td>
<td>Legal is an important aspect in our business and operations. We must comply with the relevant legal in the country we are operating. Legal is relevant for us and will always included and considered for climate-related risk assessments.</td>
<td></td>
</tr>
<tr>
<td>Market</td>
<td>Relevant, always included</td>
<td>The ever changing market and public opinion driven by NGO's campaign poses a risk to our business. This is always included in our risk assessment. E.g.: Market demand on eco-friendly products leads us to participate in several Sustainability Certification adn Verification schemes, such as RSPO, ISCC and POGD.</td>
<td></td>
</tr>
<tr>
<td>Reputation</td>
<td>Relevant, always included</td>
<td>There are risks that we may be targeted by an NGO campaign and take reputational hit. This is always included in our risk assessment.</td>
<td></td>
</tr>
<tr>
<td>Acute physical</td>
<td>Relevant, always included</td>
<td>Acute physical risks such as extreme drought and flood can greatly reduce oil palm yield. This risk is always included in our risk assessment.</td>
<td></td>
</tr>
<tr>
<td>Chronic physical</td>
<td>Relevant, always included</td>
<td>Chronic physical risks for example: increased temperature may cause disruption in oil palm production. This risk is always included in our risk assessment.</td>
<td></td>
</tr>
</tbody>
</table>
(C.2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

<th>Acute physical</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Increased severity and frequency of extreme weather events such as cyclones and floods</td>
</tr>
</tbody>
</table>

Primary potential financial impact
Decreased revenues due to reduced production capacity

Climate risk type mapped to traditional financial services industry risk classification
<Not Applicable>

Company-specific description
Increased severity of extreme weather events such as prolonged drought and flooding may reduce oil palm yield. Some study showed that 10-30% drop in production can be expected. This will decrease our production and revenue.

Time horizon
Long-term

Likelihood
About as likely as not

Magnitude of impact
Medium

Are you able to provide a potential financial impact figure?
No, we do not have this figure

Potential financial impact figure (currency)
<Not Applicable>

Potential financial impact figure – minimum (currency)
<Not Applicable>

Potential financial impact figure – maximum (currency)
<Not Applicable>

Explanation of financial impact figure
Reduced revenue from reduced production can be significant. Reduction in production can be expected due to drought and flooding.

Cost of response to risk
Description of response and explanation of cost calculation
The company has been implementing best management practices to alleviate the impact of drought and flood such as: 1. Improve soil management by recycling back cut fronds and organic waste from palm oil mill such as EFB and decanter to improve the soil moisture retention capacity and to ameliorate the drought effects. 2. Install and maintain proper drainage to better deal with flood waters. 3. Research drought or flood resistant varieties of oil palm. These activities have been implemented since a few years ago and are expected to continue in the future. They are expected to help the company to better deal with drought and flooding condition. Improved moisture retention due to biomass application help provide buffer for the palms during drought while the improved drainage will help to reduce the incidence and severity of flooding during wet months.

</thead>
<tbody>
<tr>
<td></td>
<td>Enhanced emissions-reporting obligations</td>
</tr>
</tbody>
</table>

Primary potential financial impact
Increased indirect (operating) costs

Climate risk type mapped to traditional financial services industry risk classification
<Not Applicable>
GHG emission calculation and reporting is becoming integral to the sustainability appraisal of a company. In our case, we have to calculate the GHG emissions of our upstream operations to comply with various sustainability certifications such as POIG, RSPO, ISCC, ISPO, Italian National Standard (INS) etc. It is expected that more emission reporting will be required in the future for example: Singapore in 2017 required GHG emission calculation and reporting for all sites which emitted more than 25,000 tCO2 per year. Other countries (such as Indonesia and Malaysia) which currently do not have this requirement may follow suit. This means more resources need to be allocated to calculate and report GHG emission.

**Time horizon**
Short-term

**Likelihood**
Likely

**Magnitude of impact**
Medium

Are you able to provide a potential financial impact figure?
No, we do not have this figure

**Potential financial impact figure (currency)**
<Not Applicable>

**Potential financial impact figure – minimum (currency)**
<Not Applicable>

**Potential financial impact figure – maximum (currency)**
<Not Applicable>

**Explanation of financial impact figure**
Increased operational cost because more resources need to be allocated to calculate and report GHG emission. There is also risk that some of our supplier may not be able to comply with the requirement and we have to find a new supplier.

**Cost of response to risk**

**Description of response and explanation of cost calculation**
- Establish a standardized GHG data collection system
- Provide training to staffs on GHG calculation methods
- Engage with suppliers and provide training to them on GHG calculation methods

**Comment**

**Identifier**
Risk 3

**Where in the value chain does the risk driver occur?**
Direct operations

**Risk type & Primary climate-related risk driver**

<table>
<thead>
<tr>
<th>Market</th>
<th>Changing customer behavior</th>
</tr>
</thead>
</table>

**Primary potential financial impact**
Decreased revenues due to reduced demand for products and services

**Climate risk type mapped to traditional financial services industry risk classification**
<Not Applicable>

**Company-specific description**
Changes in consumer preferences in the future may affect the sale of our main products: palm oil and its derivatives. There is an ongoing campaign in Europe which aim to reduce and ultimately displace the use of palm oil. On the other hand there is a more benign campaign to promote the use of sustainable and certified palm oil instead of displacing palm oil entirely. The impact on our business will vary depending on the outcome of those campaigns.

**Time horizon**
Short-term

**Likelihood**
More likely than not

**Magnitude of impact**
Medium-high

Are you able to provide a potential financial impact figure?
No, we do not have this figure

**Potential financial impact figure (currency)**
<Not Applicable>

**Potential financial impact figure – minimum (currency)**
<Not Applicable>

**Potential financial impact figure – maximum (currency)**
<Not Applicable>

**Explanation of financial impact figure**
Financial impact of the changing consumer behavior can range from relatively mild to severe. If the European consumer shift to demanding sustainable and certified palm oil, the impact will be milder than if the consumer reject palm oil entirely. In the former, the financial impact will be limited to the certification cost (and the cost of change in operation to comply with certifications) and supplier engagement cost. In the latter, the financial impact will be severe due to the loss of our major market.

**Cost of response to risk**
Description of response and explanation of cost calculation
- Engage in positive palm oil campaign - Certification of our operations - Engagement with suppliers to push them to certify their operations - Explore new market opportunities

Target status in reporting year
Underway

Is this a science-based target?
No, and we do not anticipate setting one in the next 2 years

Please explain (including target coverage)
Musim Mas Group is committed to Palm Oil Innovation (POIG) Charter which requires GHG emission enumeration, reduction and setting of a reduction target. The GHG emission analysis is conducted using Roundtable Sustainable Palm Oil (RSPO) PalmGHG calculator, which is a life cycle analysis (LCA)-based calculator. The analysis was conducted for twelve Musim Mas Group RSPO certified mills. Musim Mas has set a group emission reduction target of 55% in 2025 compared to baseline year, 2006. In 2018, Musim Mas has achieved 53% reduction compared to 2006. This decline in emission intensity is the culmination of our emission reduction activities, such as cessation of new planting on peat and high carbon stock area, installation of methane capture, shift fossil fuel usage to biofuel, integrated pest management practices to reduce pesticide usage. Moreover, Musim Mas also strive to keep improving the oil yield to further lower the emission intensity. Due to current pandemic, we are yet to complete our GHG quantification for current reporting year. Therefore, 2018 figure is disclosed.

(C4.2) Did you have any other climate-related targets that were active in the reporting year?
No other climate-related targets

(C4.3) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.
Yes

(C4.3a)
(C4.3a) Identify the total number of initiatives at each stage of development, and for those in the implementation stages, the estimated CO2e savings.

<table>
<thead>

<td>21-30 years</td>
<td>Palm Oil Mill Effluent (POME) is the main liquid waste of the milling process. It has very high concentration of Biological Oxygen Demand (BOD), chemical oxygen demand (COD) and various solids which make it undesirable and illegal to dispose without proper treatment. POME is conventionally treated in large open lagoons which rely on anaerobic bacteria to break down the organic matters in the wastewater. POME is the main source of emission in the mill operation, contributing up to 95% of the total mill emission as this process releases a huge amount of biogenic methane, a greenhouse gas that is 22.25 times more potent than carbon dioxide (Gan et al, 2018; IPCC, 2007). In order to overcome the large emission of POME, Musim Mas has installed methane captures to reduce the emission from mill operation by capturing the methane from POME. In 2019, this process had saved 551,002.40 tCO2e of GHG emission. Moreover, the methane captured can be utilized as gas engine feed to generate electricity. The electricity generated will then be sent to workers’ housing and national grid. The electricity generation will provide emission credit that will further reduce emission of mill operation. In 2019, Musim Mas generated 122,981,430.62 kWh of electricity from methane captures installed in palm oil mills. This is equivalent to avoidance of 99,515.34 tCO2e if the same amount of electricity was to be generated by national grid.</td>

C-AC4.4/C-FB4.4/C-PF4.4

(C-AC4.4/C-FB4.4/C-PF4.4) Do you implement agriculture or forest management practices on your own land with a climate change mitigation and/or adaptation benefit?

Yes

C-AC4.4a/C-FB4.4a/C-PF4.4a
Specify the agricultural or forest management practice(s) implemented on your own land with climate change mitigation and/or adaptation benefits and provide a corresponding emissions figure, if known.

Management practice reference number
MP1

Management practice
Land use change

Description of management practice
A land use planning following Sustainability Policy and all sustainability schemes adopted by Musim Mas are conducted before any new planting to identify land with high conservation value, high carbon stock and riparian areas which will be set aside.

Primary climate change-related benefit
Emission reductions (mitigation)

Estimated CO2e savings (metric tons CO2e)
48111

Please explain
Figure is quantified using land carbon stock default value provided by RSPO.

Management practice reference number
MP2

Management practice
Fertilizer management

Description of management practice
Side products from our own processing process, such as boiler ash, dry decanter solid and treated POME, are used as organic fertilizers in our plantations. These side products contain N and P content, which can be used to substitute N-fertilizers and P-fertilizers.

Primary climate change-related benefit
Reduced demand for fertilizers (adaptation)

Estimated CO2e savings (metric tons CO2e)
2.35

Please explain
Figure is quantified using fertilizer emission factors provided by ISCC 205.

Management practice reference number
MP3

Management practice
Integrated pest management

Description of management practice
Several integrated pest management practices are applied to reduce the use of synthetic pesticides. 1. Barn owl program to control the rat populations 2. Planting of Cassia Cobanensis, Tunera Subulata, and Antigonon Leptopus to control the caterpillar populations

Primary climate change-related benefit
Reduced demand for pesticides (adaptation)

Estimated CO2e savings (metric tons CO2e)

Please explain

(C4.4a) Do you classify any of your existing goods and/or services as low-carbon products or do they enable a third party to avoid GHG emissions? Yes

(C4.5a)
(C4.5a) Provide details of your products and/or services that you classify as low-carbon products or that enable a third party to avoid GHG emissions.

<td>Our GHG emission reduction target has been verified and monitored annually by POIG.</td>
</tr>
</tbody>
</table>

C11. Carbon pricing
C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?
No, and we do not anticipate being regulated in the next three years

C11.2

(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?
No

C11.3

(C11.3) Does your organization use an internal price on carbon?
No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?
Yes, our suppliers

C12.1a

(C12.1a) Provide details of your climate-related supplier engagement strategy.

Type of engagement
Compliance & onboarding

Details of engagement
Included climate change in supplier selection / management mechanism
Code of conduct featuring climate change KPIs
Climate change is integrated into supplier evaluation processes

% of suppliers by number
100

% total procurement spend (direct and indirect)
100

% of supplier-related Scope 3 emissions as reported in C6.5

Rationale for the coverage of your engagement
Our suppliers are enrolled in our engagement process. All suppliers can approach us on climate related issues. We actively engage all suppliers especially high-risk suppliers.

Impact of engagement, including measures of success
The suppliers are now more aware of our Sustainability Policy, Sustainability Certification Schemes as well as GHG calculation requirement and more active in engaging with us about the GHG calculation.

Comment

C-AC12.2/C-FB12.2/C-PF12.2

(C-AC12.2/C-FB12.2/C-PF12.2) Do you encourage your suppliers to undertake any agricultural or forest management practices with climate change mitigation and/or adaptation benefits?
Yes
Specify which agricultural or forest management practices with climate change mitigation and/or adaptation benefits you encourage your suppliers to undertake and describe your role in the implementation of each practice.

**Management practice reference number**
MP1

**Management practice**
Knowledge sharing

**Description of management practice**
We frequently held socialization with our FFB suppliers, in which we share our knowledge about good agricultural practices and environmental awareness.

**Your role in the implementation**
Knowledge sharing

**Explanation of how you encourage implementation**
We are collecting their usage data, including fertilizer and pesticide usage. These data will be used to demonstrate that in order to achieve higher production rate, higher usage of both fertilizer and usage data is not necessary as long as good agricultural practices are implemented. The reduction in usage will directly result in lower direct cost, which would be favorable by our suppliers.

**Climate change related benefit**
- Emissions reductions (mitigation)
- Reduced demand for fossil fuel (adaptation)
- Reduced demand for fertilizers (adaptation)
- Reduced demand for pesticides (adaptation)

**Comment**
Reduction of agricultural inputs will directly translate to lower GHG emission.

**Management practice reference number**
MP2

**Management practice**
Diversifying farmer income

**Description of management practice**
We encourage our FFB suppliers to be RSPO certified. RSPO certification could widen their market to reach big companies which require Sustainability Certification, such as RSPO. This could directly increase their income as RSPO certified FFBs has premium price.

**Your role in the implementation**
Procurement

**Explanation of how you encourage implementation**
We provide our suppliers which volunteer to be RSPO certified with agricultural equipment.

**Climate change related benefit**
- Emissions reductions (mitigation)

**Comment**
RSPO requires its smallholder members to identify their emission hotspot and establish mitigation plans to reduce the impact of identified hotspot.

Do you collect information from your suppliers about the outcomes of any implemented agricultural/forest management practices you have encouraged?
Yes

Do you engage in activities that could either directly or indirectly influence public policy on climate-related issues through any of the following?
- Direct engagement with policy makers
- Trade associations

On what issues have you been engaging directly with policy makers?

<table>
<thead>
<tr>
<th>Focus of legislation</th>
<th>Corporate position</th>
<th>Details of engagement</th>
<th>Proposed legislative solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mandatory carbon reporting</td>
<td>Support</td>
<td>We engaged with the Indonesian Government and Indonesian Sustainable Palm Oil GHG Working Group to develop GHG emission calculation tool and implement it on plantation level</td>
<td>We support the continuation of this approach methodology for calculating GHG emission to contribute more to the environment.</td>
</tr>
</tbody>
</table>

Do you engage in activities that could either directly or indirectly influence public policy on climate-related issues through any of the following?
C12.3b Are you on the board of any trade associations or do you provide funding beyond membership?
Yes

C12.3c

(C12.3c) Enter the details of those trade associations that are likely to take a position on climate change legislation.

<table>
<thead>
<tr>
<th>Trade association</th>
</tr>
</thead>
<tbody>
<tr>
<td>Roundtable on Sustainable Palm Oil (RSPO)</td>
</tr>
<tr>
<td>Gabungan Pengusaha Kelapa Sawit Indonesia (GAPKI)</td>
</tr>
<tr>
<td>Gabungan Industri Minyak Nabati Indonesia (GIMNI)</td>
</tr>
</tbody>
</table>

Is your position on climate change consistent with theirs?
Consistent

Please explain the trade association's position
The trade associations are promoting sustainable palm oil.

How have you influenced, or are you attempting to influence their position?
We strive to promote sustainable practices and implementation to all stakeholders.

C12.3f

(C12.3f) What processes do you have in place to ensure that all of your direct and indirect activities that influence policy are consistent with your overall climate change strategy?

Musim Mas placed its staff in the working groups of RSPO to help shape the policy of RSPO. Periodic review is conducted to keep the engagement within our climate change strategy framework.

C12.4

(C12.4) Have you published information about your organization's response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

C13. Other land management impacts

C-AC13.1/C-FB13.1/C-PF13.1

(C-AC13.1/C-FB13.1/C-PF13.1) Do you know if any of the management practices implemented on your own land disclosed in C-AC4.4a/C-FB4.4a/C-PF4.4a have other impacts besides climate change mitigation/adaptation?
Yes
Management practice reference number
MP1

Overall effect
Positive

Which of the following has been impacted?
Biodiversity

Description of impact
We have established high conservation value (HCV) areas to protect and preserve biodiversity and as a part of the certification processes. The establishment of HCV area impart positive impact on the biodiversity of the area compared to area without HCV.

Have you implemented any response(s) to these impacts?
No

Description of the response(s)

Management practice reference number
MP2

Overall effect
Positive

Which of the following has been impacted?
Soil

Description of impact
The implementation of Integrated Pest Management (IPM) reduces usage of pesticides, which contributes to lower soil ecotoxicity.

Have you implemented any response(s) to these impacts?

Description of the response(s)

Management practice reference number
MP3

Overall effect
Positive

Which of the following has been impacted?
Water

Description of impact
Our usage of N-fertilizer is decreased due to usage of organic fertilizer substitute. Reduced usage of fertilizer prevents excess runoff of nutrients to water bodies. Therefore, this would reduce eutrophication impact.

Have you implemented any response(s) to these impacts?
No

Description of the response(s)

C-AC13.2/C-FB13.2a/C-PF13.2a

(C-AC13.2/C-FB13.2a/C-PF13.2a) Do you know if any of the management practices mentioned in C-AC12.2a/C-FB12.2a/C-PF12.2a that were implemented by your suppliers have other impacts besides climate change mitigation/adaptation?
Yes
(C-AC13.2a/C-FB13.2a/C-PF13.2a) Provide details of those management practices implemented by your suppliers that have other impacts besides climate change mitigation/adaptation.

Management practice reference number
MP1

Overall effect
Positive

Which of the following has been impacted?
Soil
Water

Description of impacts
The reduction in both fertilizers and pesticides would lower the eutrophication and ecotoxicity impact.

Have any response to these impacts been implemented?
No

Description of the response(s)

C15. Signoff

C-FI

(C-FI) Use this field to provide any additional information or context that you feel is relevant to your organization’s response. Please note that this field is optional and is not scored.

C15.1

SC. Supply chain module

SC0.0

(SC0.0) If you would like to do so, please provide a separate introduction to this module.

Dear Customers,

Please be informed that you can go into our website (www.musimmas.com) for latest update of our business. Most the information requested in supply chain module are available in our Sustainability Report, Sustainability Policy, Sustainability Journal and many different sections on our website that can be accessed publicly. We herewith encourage you to check our website to get latest information and updates on business and development.

SC0.1

(SC0.1) What is your company’s annual revenue for the stated reporting period?

<table>
<thead>
<tr>
<th>Annual Revenue</th>
</tr>
</thead>
<tbody>
<tr>
<td>Row 1</td>
</tr>
</tbody>
</table>

SC0.2

(SC0.2) Do you have an ISIN for your company that you would be willing to share with CDP?
No
SC1.1

(SC1.1) Allocate your emissions to your customers listed below according to the goods or services you have sold them in this reporting period.

SC1.2

(SC1.2) Where published information has been used in completing SC1.1, please provide a reference(s).

SC1.3

(SC1.3) What are the challenges in allocating emissions to different customers, and what would help you to overcome these challenges?

<table>
<thead>
<tr>
<th>Allocation challenges</th>

SC1.4

(SC1.4) Do you plan to develop your capabilities to allocate emissions to your customers in the future?

Yes

SC1.4a

(SC1.4a) Describe how you plan to develop your capabilities.

We would need to engage our customers and obtain necessary information on their business and product lines.

SC2.1

(SC2.1) Please propose any mutually beneficial climate-related projects you could collaborate on with specific CDP Supply Chain members.

SC2.2

(SC2.2) Have requests or initiatives by CDP Supply Chain members prompted your organization to take organizational-level emissions reduction initiatives?

No

SC3.1

(SC3.1) Do you want to enroll in the 2020-2021 CDP Action Exchange initiative?

No

SC3.2

(SC3.2) Is your company a participating supplier in CDP's 2019-2020 Action Exchange initiative?

No

SC4.1

(SC4.1) Are you providing product level data for your organization's goods or services?

No, I am not providing data

Submit your response
In which language are you submitting your response?
English

Please confirm how your response should be handled by CDP
